

Table 3-7

	Mechanism for Implementation	Timing of Implementation	Funding for Implementation	Responsible Dept. or Agency
Agriculture				
Assist Placer County farmers by developing a strong local product identity and by promoting farmers' markets	Include information in County promotional materials. Provide grants and direct funding	Initiate after adoption	General fund or public financing	Economic Development Legacy Implementing Agency
Assist with the marketing of locally-grown produce	Include information in County promotional materials. Provide grants and direct funding	Initiate after adoption	General fund or public financing Grants	Agricultural Commissioner Economic Development Legacy Implementing Agency
Educate the public regarding the special values of locally grown crops	Include information in County promotional materials. Provide grants and direct funding	Initiate after adoption	General fund or public financing Grants	Agricultural Commissioner Legacy Implementing Agency
Utilize the Agricultural Commissioner's office as an agricultural advocate with the Board of Supervisors	Provide support to the Agricultural Commissioner's Office where appropriate. The majority of the effort will be the responsibility of the Agricultural Commissioner's Office.	Existing and ongoing service	General fund	Agricultural Commissioner
Establish neighborhood agricultural "districts" with specific policies that are locally applicable	Prepare an analysis which determines the location of agricultural districts through an evaluation of geography, water supply, crop type(s) and land use. Develop policies consistent with the common characteristics of the districts.	Initiate after year one	General fund or public financing	Planning Department Agricultural Commissioner
Encourage neighboring agricultural landowners & producers to collaborate on easements and land preservation	Evaluate the potential to meet the objectives of the program chiefly for agricultural and biological conservation	Initiate after year one	General fund or public financing	Legacy Implementing Agency
Assist farmers with tax and estate planning	Provide professional services to the agricultural community in Placer County.	Initiate after funding for services is secured	General fund or public financing	Legacy Implementing Agency Agricultural Commissioner
Implement and promote the Williamson Act to ensure that the needs of farming operations are protected	Actively promote the use of the Williamson Act including the Farmland Security Zone provisions. The County may reduce or waive filing and processing fees	Initiate after adoption	General fund or public financing	Legacy Implementing Agency Agricultural Commissioner
Make the existing right-to-farm ordinance more useful to the farmer by educating the public and by intervening in legal	Provide educational materials on the provisions and purpose of the ordinance. May involve legal intervention on behalf of farmers. Insure that the ordinance is distributed in a manner consistent with the statute (e.g., as a public disclosure	Initiate after adoption	General fund or public financing Grants	Agricultural Commissioner County Counsel

Table 3-7

	Mechanism for Implementation	Timing of Implementation	Funding for Implementation	Responsible Dept. or Agency
challenges subject to right-to-farm	document)			
Work to make water available for agriculture and at a reasonable price	Coordinate with water agencies, the Agricultural Commissioner and local agricultural organizations to determine a means of insuring a long-term and reliable source of agricultural water for western Placer County farmers.	Initiate after adoption	General fund or public financing	Legacy Implementing Agency Board of Supervisors Planning Department
Develop a program to identify methods to protect agriculturally designated areas from conversion to non-agricultural uses.	Coordinate with the Cities of Placer County and local agricultural organizations to develop methodologies (e.g, buffering techniques and transition areas) and the use of conservation easements to insure that agricultural areas are permanently protected.	Initiate after adoption	General fund or public financing	Board of Supervisors Planning Department
Biological Resources				
Organize public education and volunteer participation programs on a small sub-regional, watershed, neighborhood, or community-of-interest basis	Develop public education and outreach programs. To the extent possible, utilize the existing organizations in the County including CRMP activities, conservancy activities recreational organizations, agricultural organizations and neighborhood or community associations	Initiate after year one	General fund or public financing Grants	Legacy Implementing Agency Planning Department
Identify opportunities for Placer County agriculture to participate in protecting biological resources by working directly with the agricultural community	Continue to work with the agricultural community representatives on the implementation of the Placer Legacy effort. Insure that there is adequate representation on stakeholder groups that assist with the implementation of the program, including the regulatory compliance elements associated with biological resources.	Initiate after adoption	General fund or public financing	Planning Department Agricultural Commissioner
Involve the public in efforts to identify, fund, protect and enhance biological resources in each of the various social and geographic communities throughout the county	Develop public outreach programs for the valley, foothill and Sierra Nevada eoregions	Initiate after adoption	General fund or public financing	Legacy Implementing Agency
Utilize Placer Legacy project's comprehensive, countywide scope to address conservation opportunities on public and private lands in the Sierra Nevada	Participate in the U.S. Forest Service Sierra Nevada Framework project and other related projects. Participate in the planning and land use decisions made by the Folsom District of the Bureau of Land Management.	Initiate after public release fo Sierra Nevada Framework documents	General fund or public financing	Legacy Implementing Agency BLM, USFS and BOR
Utilize the Placer Legacy project's scientific	Actively engage the U.S. Forest Service and the Bureau of Land Management to	Initiate after adoption	General fund or	Legacy Implementing Agency

Table 3-7

	Mechanism for Implementation	Timing of Implementation	Funding for Implementation	Responsible Dept. or Agency
and technical resources to become an active participant in public land planning (U.S. Forest Service and BLM) and to coordinate with other Sierra-wide planning exercises	insure that Placer Legacy objectives are met. Staff would coordinate on land management decisions, land trades and consolidations and other related planning efforts.		public financing	BLM, USFS and BOR
Develop and coordinate policies that enhance the value of public and private forest lands in the Sierra Nevada	Coordinate policy development with the U.S. Forest Service, the Bureau of Land Management and the California Department of Forestry and Fire Protection. Policy development shall directly consider private silvicultural and public recreational interests	Initiate after adoption	General fund or public financing	Legacy Implementing Agency BLM, USFS and BOR
Identify areas in the Sierra suitable for local government or non-governmental protection	Coordinate with private and public landowners in the Sierra Nevada to identify areas where Placer Legacy conservation objectives can be met. Utilize the data collected through the program to inform decision-making to insure protection of valuable resources		General fund or public financing	Legacy Implementing Agency BLM, USFS and BOR
Participate in land exchanges, management agreements or similar programs to facilitate protection of Sierra ecosystems	Actively engage the U.S. Forest Service and the Bureau of Land Management to identify opportunities to trade and consolidate lands that further the objectives of the Placer Legacy effort.	Initiate after adoption	General fund or public financing Grants	Legacy Implementing Agency BLM, USFS and BOR
Develop a program to monitor trends in the county that will impact open space resources and to evaluate the success of resource protection and management actions	Develop a trend monitoring program and implement management actions in response to findings.	Initiate after year one Ongoing program	General fund or public financing	Legacy Implementing Agency
Monitor trends to alert the County to a need for action before a resource is in crisis	Provide general interagency coordination and cooperation and assign staff to specifically monitor trends, state/federal laws, case law and local land use changes in the unincorporated and incorporated areas of Placer County and the region.	Initiate after adoption Ongoing program	General fund or public financing	Legacy Implementing Agency
Develop long-term objectives and a monitoring program designed to determine whether the objectives are being met and how management may be changed to perform better	Evaluate program objectives and provide further specification on how the particular conservation targets are to be met over time with an identification of measures of success that are measureable and reportable. Monitor the program to insure that the conservation targets are met and where they are not met, how changes can be made to insure goals are achieved.	Initiate after adoption Ongoing program	General fund or public financing	Legacy Implementing Agency

Table 3-7

	Mechanism for Implementation	Timing of Implementation	Funding for Implementation	Responsible Dept. or Agency
Protect oak woodland areas and included communities of unusual biological diversity, age structure, understory component, landscape linkage, or scenic value by the following means: 1) resident education about oak woodland value, 2) local conservation action, 3) continued application of County policy on discretionary land use entitlements (e.g., the Rural Development Design Guidelines) and 4) through continued implementation of County ordinances	Develop incentive and education based programs to inform the public on the value of oak woodlands and how the conservation of these resources are beneficial as fish and wildlife habitat, aesthetics and property values. Incentive based programs may include financial compensation for the protection of oak woodland resources. Both County community plan and general plan policy would be applied to discretionary projects and the environmental review ordinance (CEQA), grading and tree ordinance would be applied consistent with current practices.	Initiate after adoption Ongoing program	General fund or public financing Grants	Legacy Implementing Agency Planning Department
Outdoor Recreation				
Encourage, facilitate and evaluate the potential to fund volunteer efforts to provide trail systems, access, or recreational facilities	Initiate the coordination of volunteer organizations to facilitate the development and maintenance of trails and other recreational facilities. Assist existing volunteer and other interest based organizations where possible.	Initiate after adoption	General fund or public financing Grants	Legacy Implementing Agency Parks Division
Ensure that zoning regulations maintain private recreation facilities as a viable land use	Evaluate the Placer County Zoning Ordinance to insure that there are adequate opportunities to provide a wide variety of recreational pursuits on private property Particular emphasis will be placed on evaluating the Timberland Preservation Zone.	Initiate after adoption	General fund	Planning Department
Determine whether there are ways for the County to optimize and safeguard river, lake and reservoir recreation.	Analyze current water-based recreational trends and opportunities to determine where there are unmet demands.	Initiate after year two	General fund or public financing	Legacy Implementing Agency Parks Division
Cultural Resources				
Provide opportunities to protect and conserve historical resources by providing revenues to identify, evaluate, maintain and where appropriate, acquire historical resources	Evaluate historical resources and development incentive-based programs to protect these resources. Where appropriate identify historical locations and structures that warrant protection and work with property owners and where appropriate, willing sellers to protect these resources.	Initiate after adoption	General fund or public financing Grants	Legacy Implementing Agency County Museum's Department

Table 3-7

	Mechanism for Implementation	Timing of Implementation	Funding for Implementation	Responsible Dept. or Agency
Provide revenues to identify, evaluate and where property with cultural resources including Native American archaeological resources or paleontological resources.	Evaluate cultural resources and development incentive-based programs to protect these resources. Where appropriate identify cultural locations and structures that warrant protection and work with property owners and where appropriate, willing sellers to protect these resources.	Initiate after adoption	General fund or public financing Grants	Legacy Implementing Agency County Museum's Department
Scenic Resources/Urban Separators				
Prepare a new scenic highway element of the Placer County General Plan	Review community plans, the previous scenic highways element and data collected from Placer Legacy and prepare a new Scenic Highways Element	Initiate after adoption	General fund or public financing	Planning Department
Preserve scenic transportation corridors	Engage the public in an effort to identify and inventory scenic transportation corridors Prioritization of conservation activities, including acquisition, should be based upon public input. Project-by-project implementation will be applied to discretionary projects Where appropriate, acquisitions may also apply.	Initiate after year one	General fund or public financing Grants	Planning Department Legacy Implementing Agency
Identify the visual quality objectives for each scenic transportation corridor and evaluate the impact of land use changes within the corridor	Utilize public input gained from the tasks above and analyze through the use of the GIS where land use changes can be anticipated and the impact of those changes on scenic quality. Use the conclusions of the data to set priorities for conservation activities.	Initiate after year one	General fund or public financing	Planning Department Legacy Implementing Agency
Identify ridgelines that contribute to the scenic quality and value of an area	Engage the public in an effort to identify and inventory scenic ridgelines. Prioritization of conservation activities, including acquisition, should be based upon public input.	Identify after year one	General fund or public financing	Legacy Implementing Agency
Identify and inventory significant scenic locations and vistas that are not within a scenic corridor	Engage the public in an effort to identify and inventory scenic locations and vistas. Prioritization of conservation activities, including acquisition, should be based upon public input.	Identify after year one	General fund or public financing	Legacy Implementing Agency
Identify strategic opportunities to protect open space edges and buffers particularly when other open space values are present, e.g., stream corridors, scenic roadways, and sensitive species habitat	Engage the public, the Cities and property owners in an effort to identify edges and buffers. Prioritization of conservation activities, including acquisition, should be based upon public input.	Monitor strategic opportunities	General fund or public financing	Planning Department Legacy Implementing Agency
Public Safety				
Catalog lands with a public safety constraint	Utilizing existing data sources, including the GIS system, identify public safety lands	Initiate after year two	General fund or	Legacy Implementing Agency

Table 3-7

	Mechanism for Implementation	Timing of Implementation	Funding for Implementation	Responsible Dept. or Agency
and use this as part of the information in screening and ranking lands for open space conservation.	that have the potential to also meet other open space and agricultural conservation objectives of the program.		public financing	Flood Control District, Dept. of Public Works and CDF
